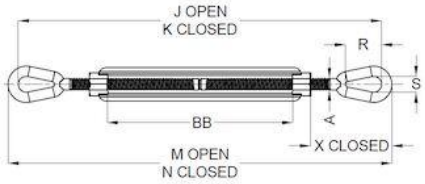
Galvanized Eye-to-Eye Turnbuckles

Drop forged · Hot-dip galvanized · Nutty catalog sizes

Eye-to-Eye configuration



All dimensions in inches.
Nominal size = thread diameter × take-up, not overall length.

WLL is the working load limit for the specified complete assembly. A body alone does not establish an assembly rating.

Nutty stock #	Dia. × take-up	WLL (lb)	A	J	K	M	N	R	S	X	BB

BB values use matching jaw-to-jaw sizes, as specified by Nutty. Dimensions are published reference values; confirm critical fit requirements before ordering.

Selection & safe use: Use for straight, in-line tension only. Do not side-load or shock-load. Confirm the manufacturer's working load limit for the complete assembly and follow its installation instructions. Ensure full thread engagement, secure jaw-end pins and retainers, and prevent unintended unscrewing in long-term installations. Inspect before use; remove damaged or worn components from service.

Stock numbers and WLL cross-checked against Nutty catalog. Dimensional reference: Elite Sales Eye-to-Eye turnbuckles; drawing: Nutty catalog. November 2026.
