2.0 Material & Application

Material: Low carbon hot-rolled steel plate, unhardened

Finish: Hot-dip galvanized (ASTM A153 / F2329)

Hole: Punched, centered, 1/16" over bolt size

- The large square bearing face spreads bolt load over soft timber so the head or nut won't crush into the wood, and resists turning as the nut is tightened.
- For carriage bolts, lags, anchor bolts and threaded rod in timber framing, decks, docks, pole barns and sill plates.
- Hot-dip galvanized for outdoor use and treated lumber – pair with hot-dip galvanized bolts and nuts.
